

# Colloquium

Wintersemester 2011/12, Thursdays, 4pm

Date	Speaker/Topic	Host
6.10.11	<b>Giorgio Scita</b>  MECHANISMS OF CELL MIGRATION: the role of the multifunctional actin regulatory protein Eps8	<b>F. Melchior</b>
13.10.11	<b>Axel Behrens</b>  Transcriptional control in stem cells and cancer	<b>P. Angel</b>
27.10.11	<b>Lars Hufnagel</b>  Biophysical Aspects of Embryonic Development	<b>M. Knop</b>
3.11.11	<b>Karla Neugebauer</b>  Gene expression in its natural habitat: transcription and splicing on chromatin	<b>O. Gruss</b>
10.11.11	<b>Karsten Rippe</b>  Dissecting the mechanism of alternative telomere lengthening in cancer cells	<b>S. Erhardt</b>
17.11.11	<b>Wilfried Weber</b>  Programming Mammalian Cells with Synthetic Gene Networks	<b>V. Sourjik</b>
24.11.11	<b>Romeo Ricci</b>  MAPK stress signaling in diabetes and inflammatory diseases	<b>S. Herzig</b>
1.12.11	<b>Oliver Schilling</b>  Understanding cellular proteolysis with proteomic approaches	<b>M. Lemberg</b>
8.12.11	<b>Sabine Werner</b>  Organizing Chromosomes for Mitosis	<b>P. Boukamp</b>
15.12.11	<b>Ron Hay</b>  SUMO as a signal for ubiquitin mediated proteolysis	<b>F. Melchior</b>
12.1.12	<b>Julie Cooper</b>  Telomeres as choreographers of chromosome replication, location and segregation	<b>B. Luke</b>
19.1.12	<b>Javier F. Caceres</b>  Regulation of miRNA biogenesis and function	<b>G. Stöcklin</b>
26.1.12	<b>Roberto Kolter</b>  Cell-Cell Communication in the Microbial World	<b>Graduate Students</b>

2.2.12 **Susan Gasser**

**B. Luke**

Chromatin remodelers and their roles in genome stability
